

METHODOLOGY

Case Receiving

We initiate our work immediately after the client's approach.

Client Details

We start our task after the collection of all the essential information and exhibits, and after obtaining all the proper description of the case, whether it be an exhibit or about investigation at the crime scene.

Confidentiality

With this, we ensure to secure all the information of the case as well as of the exhibit and it won't be shared with any third party.

Exhibit Authentication

As per the query of clients, we begin our work by visiting the crime scene and/or obtaining the exhibit/s from there. All the exhibits are carefully lifted, packed, preserved and brought to the laboratory.

Lab Analysis

As per your query, our experts begin working on the exhibits provided by the client or obtained from the crime scene for the analysis. After the initiation of analysis, our experts examine every minute details or features of the provided exhibit by performing the thorough physical examination of the exhibit using specialized equipments. Initially preliminary tests are performed, followed by confirmatory tests. A re-check is performed for satisfying zero-error, after the completion of all the procedure of analysis.

Expert Opinion

After the completion of all the analysis, the expert provides you a detailed forensic report about the analysis performed and results obtained.

Court Testimony

If required, the experts are available to you PAN India for giving testimony in courts.
